

## **TECHNICAL DATASHEET**

### **TREASURE Pearlescent effect**

#### **PRODUCT DESCRIPTION**

A decorative coating with pearlescent metallic pigments and a selection of quartz aggregates to create a smooth or textured finish with metallic shades. This coating adds to the substrate a beautiful visual and tactile effect providing an exceptional decorative pattern.

#### **PRODUCT BENEFITS**

- 1- Water based, non-flammable, odorless & non-toxic
- 2- Simple and practical application
- 3- Versatile, it provides different shades and textures depending on the type of product, the application tools and the application process.
- 4- It can be applied even on substrates that are not perfectly smooth
- 5- It provides a decorative as well as a protective finish

#### **RECOMMENDED USES**

This coating is applied on interior substrates to achieve a high quality decorative finish which matches perfectly a trendy modern environment. Due to its ease of application, it can be applied by both professional and unprofessional applicators. Different types of tools can be used depending on the finish desired.

#### **SURFACE PREPARATION**

Surfaces should be solid, clean and dry, free from oil, grease, salt, dust and other contaminants. To have an even finish and achieve the desired effect, the substrate must be primed before applying the coating.

## PHYSICAL AND CHEMICAL PROPERTIES

### Physical Properties

Physical State	viscous liquid
Appearance	pearlescent/ sandy pearlescent
Color	cf. catalogue

**Temperature @ 30° C**  
**Relative Humidity max 50%**

Specific Gravity, ISO 2811	1.05-1.2 g/cm <sup>3</sup>	Viscosity,
ISO 2884	15-20 poises	

Drying Time	1 hour to touch
Recoat Time	4-8 hours (depending on the thickness applied)
Coverage	5-8 m <sup>2</sup> / Kg

## APPLICATION

### Warning:

Mix the product properly before application.

### Dilution:

The coating can be diluted according to the application and the tool used: For trowel application, the coating can be applied without dilution for brush and roller application, the product can be diluted up to 10%

To have the optimal decorative effect, prior to the application of TREASURE, apply two coats of Latex emulsion or Vinyl matte on the substrate.

After complete drying (6-8 hours), apply 1 or 2 coats of Treasure depending on the desired effect. Recoating should be carried out after complete drying of the first coat. Drying time depends on the thickness applied. Different tools can be used in order to achieve the finish required: brush, roller, trowel...

Clean tools and equipment with water immediately after use.

## PACKING

In cylindrical tin containers of the following capacities:

- 1 US gallon = 3.78 L
- 1 Quart = 0.946 L

## STORAGE

Avoid frost & excessive heat.
