

TECHNICAL DATASHEET

WATER-BASED VARNISH

PRODUCT DESCRIPTION

A tough durable transparent finish providing high protection to substrates subject to wear, sunlight and weathering conditions. Its formulation boosted with UV stabilizers and dry film biocides makes it ideal for outdoor applications providing long lasting protection.

PRODUCT BENEFITS

- 1- Eco-friendly product
- 2- High resistance to abrasion and scratches
- 3- High resistance to blistering and flaking
- 4- Non-yellowing
- 5- High resistance to stains and detergent solutions
- 6- Weathering resistance
- 7- Great flow and open time
- 8- Excellent leveling properties
- 9- Excellent anti-blocking properties.

RECOMMENDED USES

Ideal for use on most wooden surfaces such as garage doors, shutters, window frames, doors, garden furniture, gates etc. It may also be applied over existing paint to protect the system while maintaining its aesthetical appearance.

SURFACE PREPARATION

Surfaces should be solid, clean and dry, free from oil, grease, salt, dust and other contaminants.

- 1- Alkaline and acid surfaces should be cleaned and neutralized.
- 2- Deteriorated previous coatings, weak and blistered paints or chalky substances should be removed by scrapers, paint removers or flame spraying.
- 3- Non-disintegrated paints or glossy surfaces of previous coatings should be roughened slightly with sand paper to ensure good intercoat adhesion.
- 4- Holes, crevices, hollows, irregularities etc. ... should be filled with Ready Putty
- 5- Concrete surfaces must be pretreated and neutralized before applying the varnish.

PHYSICAL AND CHEMICAL PROPERTIES

Physical State Liquid
Appearance Clear
Color Range Gloss, Semi-Gloss, Matte
Odor None

Temperature 25⁰C
Relative Humidity 60%

Specific Gravity, ISO 2811 1-1.1 g/cm³
Viscosity, ISO 2884 8-12 poises

Drying Time, ASTM D5894 2-3 hours
Recoat Time 4-6 hours

Sag Resistance, ASTM D3730 Excellent
Leveling Excellent
Abrasion Resistance Excellent
Excellent

Scratching Resistance Excellent

Chemical Properties

Solids by Weight 60-62 %
Solids by Volume 55-57 %

PRIMING / THINNING/ APPLYING

- 1- Smooth & Take off dust from wooden surface
Knots should be filled.
- 2- Apply the first coat of varnish diluted up to 100% on unpainted substances. Leave to dry for about 8-12 hours, rub down slightly with a fine sand paper and apply the second coat diluted up to 50%.
If needed, apply a wood stain before applying the varnish

Clean tools and equipment with water immediately after use.

PACKING

In cylindrical tin containers of the following capacities: ● 1 US Quart = 0.95 L.

- 1 US gallon = 3.78 L.
- 1 Pail (5 U.S.G.) = 20L

STORAGE

Avoid frost & excessive heat.
