TECHNICAL DATASHEET

NITROCELLULOSE PRIMER

PRODUCT DESCRIPTION

Fast-drying nitrocellulose primer for wood and metal surfaces. It offers excellent adhesion on different substrates and exhibits exceptional holdout even on very porous surfaces. Easy to sand, it provides an excellent base to achieve a smooth finish. Use with NC lacquer and NC topcoats.

PRODUCT BENEFITS

- 1- Fast drying
- **2-** Good scratching resistance
- **3-** Excellent durability and washability
- **4-** Perfect adhesion
- 5- High temperature stability
- **6-** Great intercoat adhesion
- **7-** Good hardness
- 8- Excellent recoatability

RECOMMENDED USES

Special primer for nitrocellulose systems. Suitable for wood, steel surfaces and automotive applications. It is used as a pre-treatment primer for mild steel, galvanized iron and aluminum prior to applying the full paint system and a self-priming finish in a variety of applications.

Ideal for use on vehicle chassis and under body components, engine parts, metal fireplaces, burglar bars, security gates.

SURFACE PREPARATION

Surfaces should be solid, clean and dry, free from oil, grease, salt, dust and other contaminants.

- 1- Alkaline and acid surfaces should be cleaned and neutralized.
- 2- Deteriorated previous coatings, weak and blistered paints or chalky substances should be removed by scrapers, paint removers or flame spraying.
- 3- Non-disintegrated paints or glossy surfaces of previous coatings should be roughened slightly with sand paper to ensure good adhesion.

Fill all the pores and holes with NC Ready Putty to smooth the surfaces before Priming.

PHYSICAL AND CHEMICAL PROPERTIES

Physical Properties

Appearance Viscous liquid Color Range Cf. catalogue

Specific Gravity, ISO 2811 1.2- 1.3 g/cm³ Viscosity, ISO 2884 60-70 Poises

Drying Time, ASTM D5894 1-2 hours Wet Film Thickness, ISO 2808 100 μ m Dry film Thickness, ISO 2808 50 μ m Recoat Time 2-3 hours

Sag Resistance, ASTM D3730 Excellent Leveling, ASTM D2801 Excellent

Scratching Resistance, ASTM D3003 Excellent

Chemical Properties

Solids by Weight 54- 65 % Solids by Volume 37- 47%

PRIMING/ THINNING/ APPLYING

Fill existing pores and holes with NC Putty.

Thin NC primer with NC thinner up to 75% depending on the surface condition in order to obtain the adequate viscosity for application.

Brush, Roller or Spray

Apply several coats if needed to smooth the surface

Clean tools and equipment with NC thinner immediately after use.

PACKING

In cylindrical tin containers of the following capacities:

- 1 US Quart = 0.95 L.
- 1 US gallon = 3.78 L.
- 1 Pail (5 U.S.G.) = 20 L

STORAGE
